MICRO-TECH SYMPOSIUM VAC STENT GI

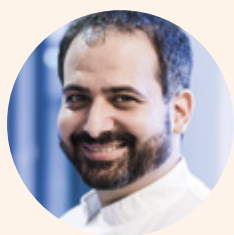

APRIL 21 FROM 12:45

From 12:45 to 13:45 we welcome you to our symposium in the room “Liffey Hall 2”. Look forward to “Advances in Endoscopic Vacuumtherapy for Upper GI-defects” with a top-class team of experts, who will show you the possibilities of the VacStent GITM in the treatment of leakage and anastomotic insufficiencies.

CHAIR

Prof. Arnaud Lemmers
Head of Clinic, Hospital Erasme, Brussels

Dr. med. Christian Gerges
Head of Department GI Endoscopy,
University Hospital Essen

SPEAKERS

Dr. Roos Pouw
Deputy Head of Gastroenterology and
Hepatology Department, Amsterdam UMC

Lisanne Pattynama, MD
Research fellow, Amsterdam UMC

HANDS-ON AREA FOR MORE PRACTICE

TEST OUR SOLUTIONS ON A MODEL

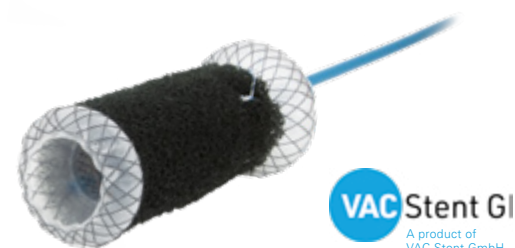

At our stand 28 you will find three hands-on areas where you can test our solutions. Train on a lifelike model and get valuable tips from our application specialist team.

THE HIGHLIGHTS AT ESGE DAYS

ERCP SHORT WIRE SYSTEM

- More control over the guidewire
- Reduced contamination risks
- More work efficiency

VAC STENT GI

- Combines two reliable methods
- Continuous drainage
- Complete covering of the wound cavity

LOCKADOTM G-TYPE

- Opening width up to 20 mm
- Ten teeth for an ideal grip
- Increased compression pressure

EUS-FNB TRIDENTTM

- For histological tissue structures
- 1 mm grid for precise penetration depth
- Flexible Co-Cr needle with trident tip

WE LOOK FORWARD TO YOUR VISIT.
